

# Muhammad Faheem Iqbal

Full Stack Developer (React.js / Next.js)

**Nationality:** Pakistani **Location:** Islamabad, Pakistan

**Phone:** +92 332 5194976 **Email:** [faheemiqbalm@gmail.com](mailto:faheemiqbalm@gmail.com) **Blog:** [Medium](#)

**LinkedIn:** [in/faheem506pk](#) **GitHub:** [Faheem506pk](#) **Portfolio:** [faheem506pk.vercel.app](#)

**Availability:** Open to relocation within the EU and remote roles

## ABOUT ME

Full Stack Developer with 2+ years of professional experience across teams in 3 countries (Pakistan, Austria and the United States), promoted to Software Engineer within 11 months. I build production web platforms with React.js, Next.js, TypeScript, Node.js and Python, and currently work on TabTake, an all-in-one restaurant management system. I write unit and end-to-end tests, automate testing and deployment with CI/CD, and use AI coding agents and LLM APIs to build AI tools and work faster. Passionate about IoT: my smart home project was featured by 3 national media outlets.

## WORK EXPERIENCE

01/2026 – CURRENT | Islamabad, Pakistan

### Software Engineer (Full Stack)

[MicroMerger \(Pvt.\) Ltd](#) (promoted from Associate)

- Full stack development with React.js, Next.js, Node.js, Python and the Frappe/ERPNext ecosystem.
- Contributed to 5+ confidential client projects across both roles, using React.js, Next.js, Redux, Frappe/ERPNext and UI libraries such as Chakra UI.
- Collaborate closely with team members through GitHub-based workflows, sharing knowledge to keep delivery aligned.

### TabTake: all-in-one restaurant management system

- Develop features for TabTake, an all-in-one restaurant management system covering online ordering, delivery and collection, QR ordering, reservations, menus and multi-location management.
- Work across the frontend (React.js, Next.js, TypeScript) and backend.
- Build responsive, reusable components from Figma designs and apply SEO best practices.

02/2025 – 01/2026 | Islamabad, Pakistan

### Associate Software Engineer

[MicroMerger \(Pvt.\) Ltd](#)

- Frontend development with React.js, TypeScript and Tailwind CSS, and support on ERPNext implementations.
- Delivered WordPress sites with Advanced Custom Fields, including Speedy Eats, a restaurant website with a custom theme and CMS.
- Built admin panels with Ant Design, Material UI and Chakra UI; deployed production apps on Vercel.

11/2024 – 02/2025 | NSTP, Islamabad, Pakistan

### Frontend Development Intern

[Alphabase \(US-based\)](#)

- Developed Qotion, a Notion-style collaborative table app with drag-and-drop and real-time sync (React, TypeScript, Firebase).
- Improved UI/UX on the Zaplead.ai platform.
- Managed application state with Jotai, Zustand and React Context API.

09/2023 – 03/2024 | Remote

### Frontend Developer

[JUHUU GmbH \(Austria\)](#)

- Built the JUHUU Marketplace and BikeBox websites with React.js, Tailwind CSS and JavaScript.
- Implemented BikeBox bike rental features: product listing, filtering, booking flow and mobile optimisation.

01/2020 – 06/2024 | Remote

### Social Media Manager (Part-time)

[BestMobile.pk](#)

- Managed social media content and visuals (Photoshop, After Effects) alongside university studies.

## EDUCATION AND TRAINING

10/2020 - 09/2024 | Punjab, Pakistan

### Bachelor of Science in Information Technology University of Chakwal

- Final year project: PlantPulse, an IoT system for controlled-environment farming (ESP32, React, Firebase). Designed the full circuit and hand-etched custom PCBs; automated control of temperature, humidity and soil moisture; built a real-time status dashboard with reports. Adaptable to any controlled environment.

## LANGUAGE SKILLS

Mother tongue(s): Urdu

|         | UNDERSTANDING |         | SPEAKING          |                    | WRITING |
|---------|---------------|---------|-------------------|--------------------|---------|
|         | Listening     | Reading | Spoken production | Spoken interaction |         |
| English | C1            | C1      | C1                | C1                 | C1      |
| Punjabi | C2            | B2      | C2                | C2                 | B1      |

Levels: A1 and A2 Basic user; B1 and B2 Independent user; C1 and C2 Proficient user (Common European Framework of Reference for Languages)

## DIGITAL SKILLS

|                       |                                                                                                                                               |
|-----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|
| Frontend              | React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3                                                                                 |
| UI libraries          | Tailwind CSS, Shadcn/UI, Radix UI, Ant Design, Material UI, Chakra UI, Bootstrap                                                              |
| State and storage     | Redux, Zustand, Jotai, Context API, IndexedDB, localStorage, cookies                                                                          |
| Backend and databases | Python, Node.js, Express, REST APIs (Frappe, Express), MySQL, PostgreSQL, Supabase, Neon, MongoDB, Redis (caching), Firebase; Clerk, NextAuth |
| IoT                   | Arduino, ESP32, C++, Blynk IoT, Amazon Alexa, sensors, basic PCB and circuit design                                                           |
| ERP and CMS           | Frappe (Python), ERPNext, WordPress (ACF)                                                                                                     |
| Tools                 | Git, GitHub, GitLab, Vercel, Postman, Figma, Jira, Linux (Ubuntu), CLI                                                                        |
| Testing and CI/CD     | Jest (unit), Playwright (end-to-end), GitHub Actions (auto test and deploy on push)                                                           |
| AI agents             | Claude Code, Codex, Google Antigravity, Google Jules (AI-assisted development)                                                                |
| AI design and APIs    | Google Stitch, Claude Design, Google Flow, OpenRouter API (AI tools, chatbots)                                                                |
| Practices             | Responsive design, accessibility (WCAG), SEO, performance, Agile/Scrum                                                                        |

## PROJECTS

- Smart Home Automation and Security System** | 2021 - 2022 | Arduino (C++), Blynk IoT, Amazon Alexa, fingerprint sensor  
Converted my family home into a smart home: remote control of all electrical appliances from a mobile phone, Alexa voice commands, fingerprint smart door locks and night vision security sensors. Featured in national media.
- StitchSmart** | 2025 | React, TypeScript, Firebase, Zustand  
Tailor shop management system with role-based access, payments, analytics and offline support using IndexedDB.
- Liquid Ether** | Open source | JavaScript, Three.js, WebGL  
Interactive real-time fluid simulation that responds to mouse and touch input.
- Frappe v16 Installation Guide** | Open source | Ubuntu, Python, Node.js, MariaDB, Redis  
Developer guide and installer script for Frappe Framework v16 on Ubuntu 24.04.

## ACHIEVEMENTS AND MEDIA

- Smart home project, built as a first-year BS IT student, featured by [ARY News](#) (TV news report, 2022), [UrduPoint](#) (video interview, 2022) and [KarDikhao.com](#) (article, 01/2024).
- Technical writing:** Articles on software engineering and career growth on [Medium](#).
- More projects:** 25+ public repositories at [github.com/Faheem506pk](#) | **References:** Available on request.
